

VMBIN datasheet

Universal 1-channel input module

Single channel input module (potential free) for Velbus

Features

- one input
- adjustable input response time (0, 1, 2 or 3 seconds)
- detection of short or long press
- configurable multi-channel operation on input, the next channel is selected at each press (up to 8 channels)
- configurable dual channel input, a different channel is selected depending on the length of the push (short or long push)
- extensive day, week and year programs plus a built-in astronomical clock (sunrise and sunset timing) are included to operate push buttons automatically
- configurable by using a Velbus PC interface and the free VELBUSLINK program

Specifications

supply voltage	15±3 VDC
address range	1-250
number of program steps	70 max
dimensions	58 x 37 x 18 mm
current consumption	20 mA
